Acronimo Project

What we have to do/fix

1. Login/registration popup forms and pages (TO DO)

2. Fix Issues and make this page completely working

3. Make the settings page with the basic information edit: password, name, last name, shipping address,…

4. Integrate payment method (stripe) and purchasing system. Only logged people can purchase the membership so, if user is not logged he has to log in or sign up.

After the payment is done the user can track his order on his profile and he has to be able to see the order details in his profile.

Let's start organize the the purchasing system in order to integrate, in the future, the possibility to purchase different items.

5. Make the search bar working: it is necessary in order to find other users.
